

AgriQual

AI-Driven Crop Diagnosis & Advisory System

⚠ The Problem

Wheat disease diagnosis is slow, location-bound, and lacks integrated advisory or field tracking.

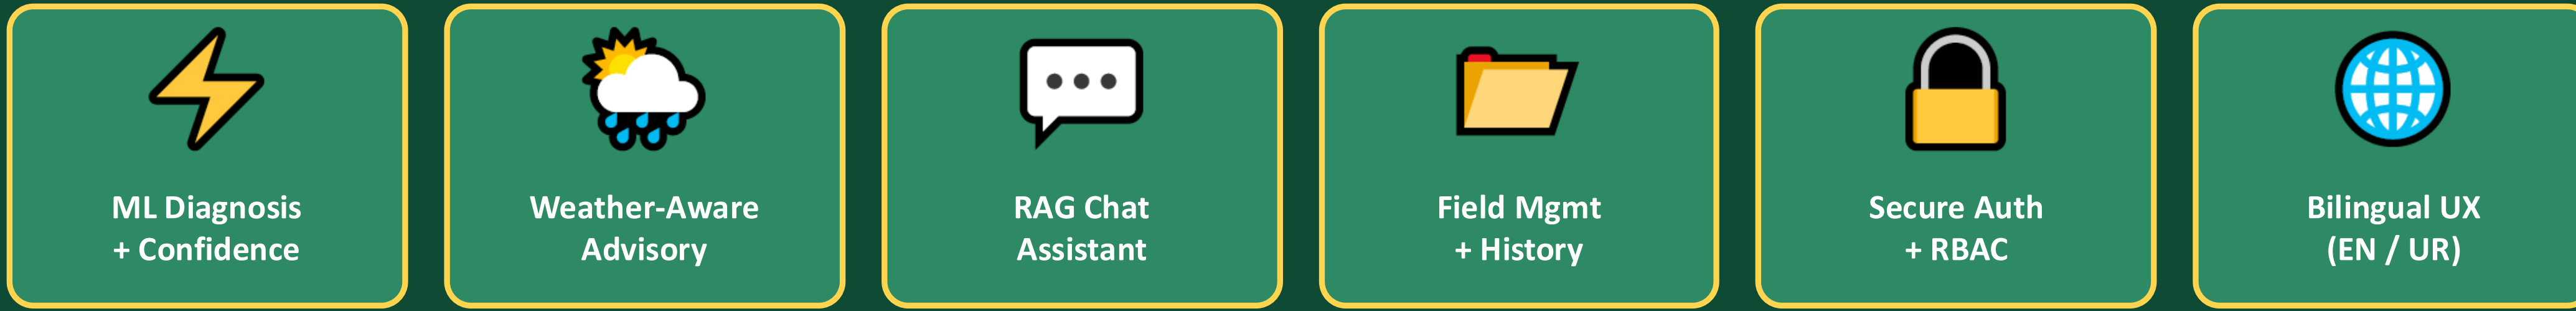

✓ Our Solution

An AI web platform uniting image diagnosis, weather-aware advice, chat, and field tracking in one place.

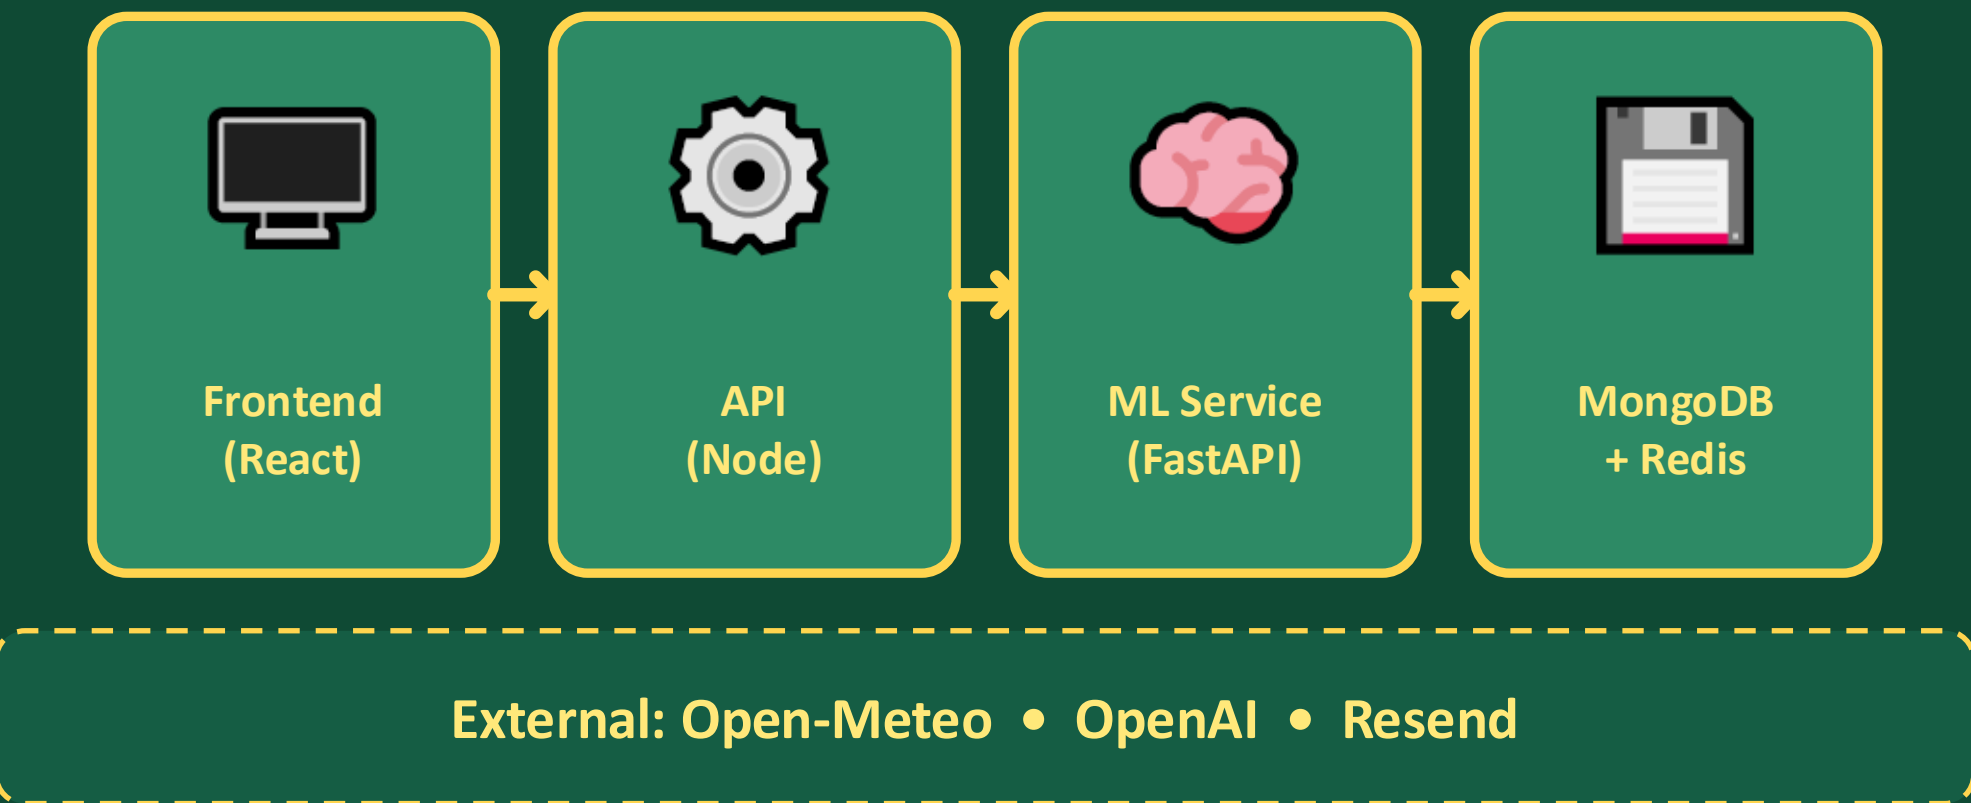

How AgriQual Works

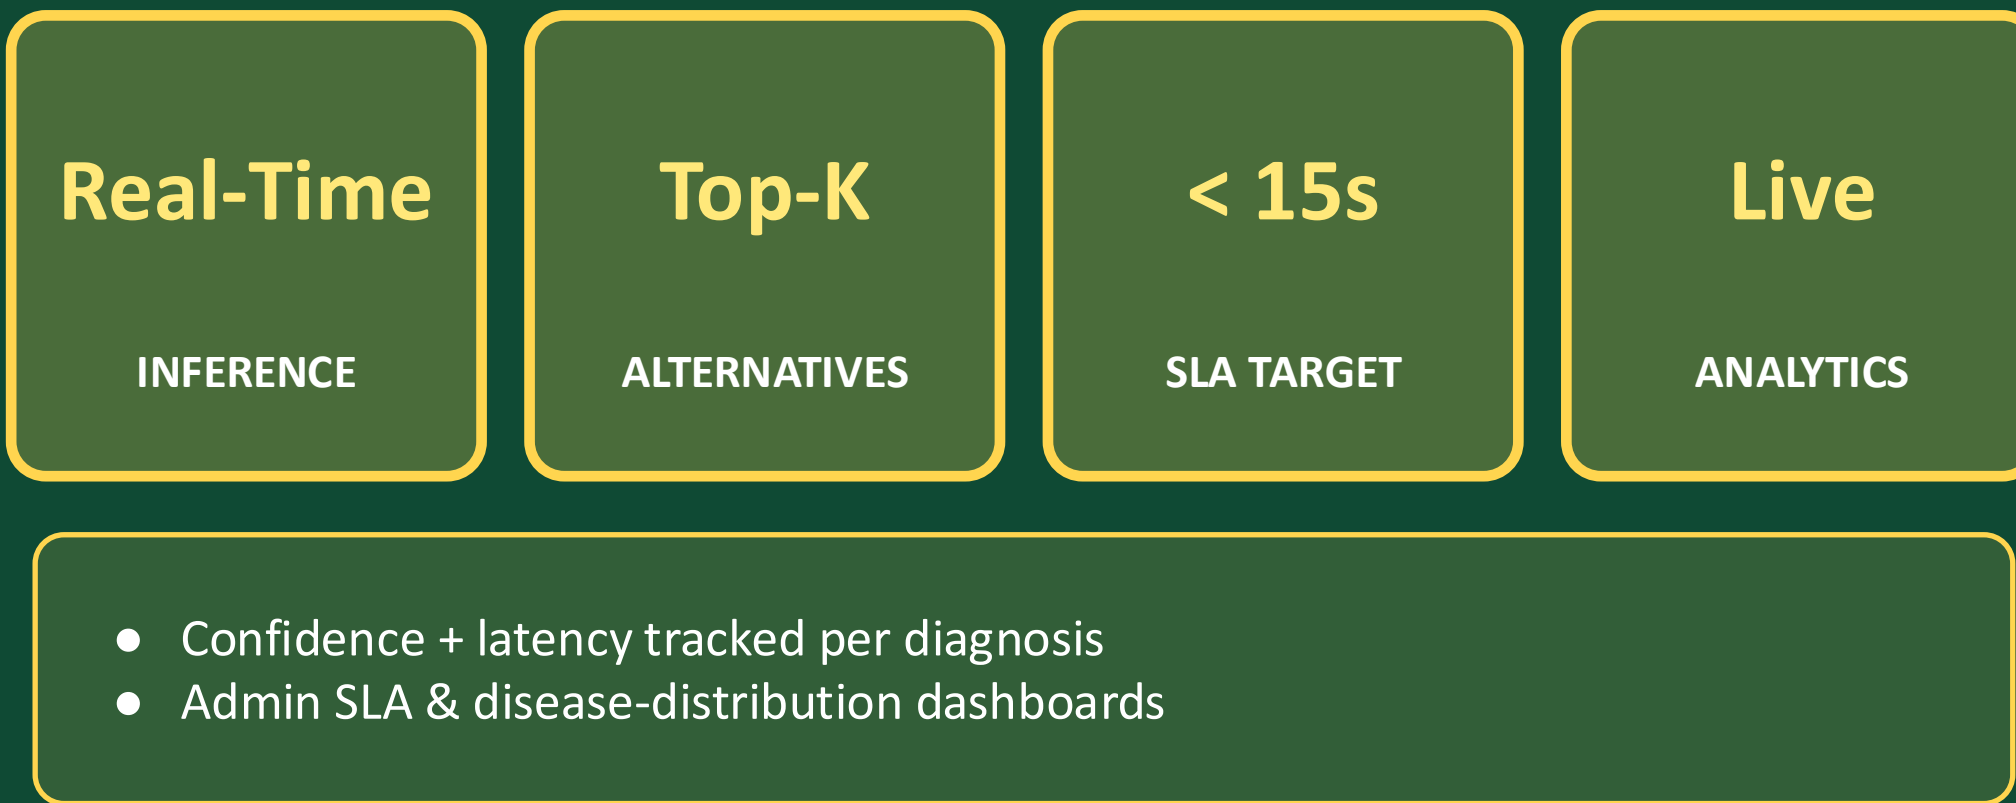

Core Features

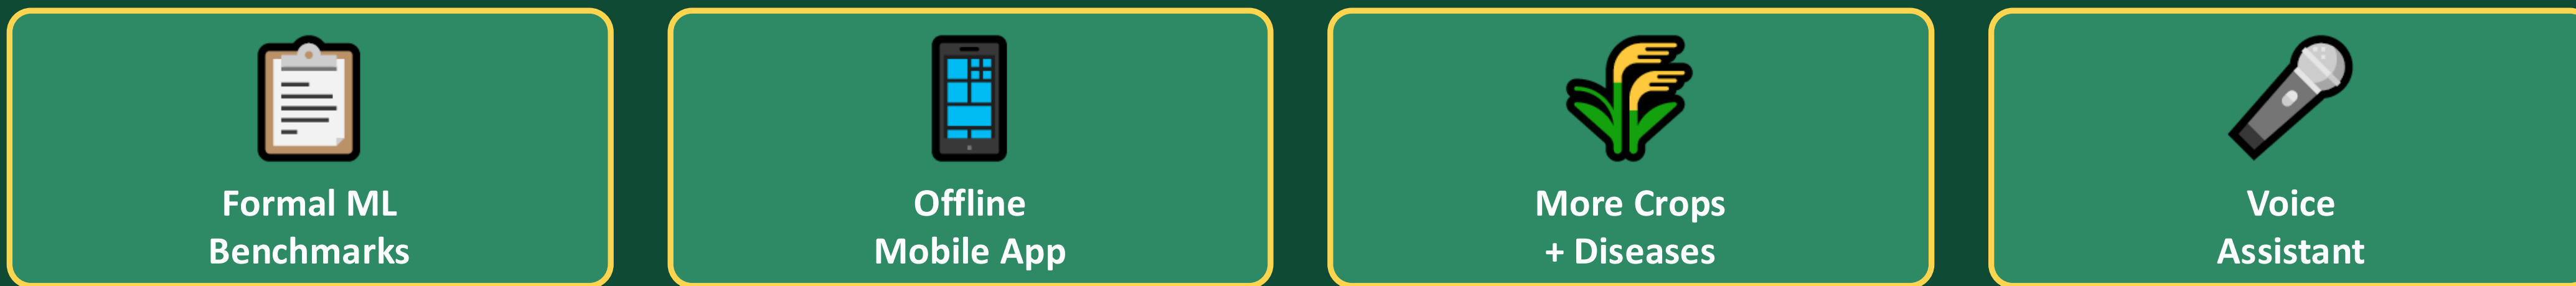

System Architecture

Results & Performance

Future Work

FARMERS

- ▶ Early disease detection
- ▶ Timely, weather-aware advice
- ▶ Reduced crop loss

INSPECTORS

- ▶ Faster crop assessment
- ▶ AI-assisted confidence scores
- ▶ Compliance & SLA tracking
